

Professional Landscapers who attended NC Cooperative Extension Service Stream Dr. Training

*While we do not recommend any particular business, here is a list of professional landscapers who have attended a workshop and hands-on training on small-scale stream repair from the NC Cooperative Extension Service. If you are hiring a professional, we encourage you to interview prospective service-providers carefully to learn about their background and experience in doing the kind of work you have in mind, and to check references. If you need assistance with stream work, be sure to specify that you want a professional who will utilize **natural channel design** to the greatest extent possible.*

Unless otherwise noted, all telephone numbers are in area code 828.
